# SAGEGLASS HARMONY

THE WORLD'S MOST  
ELEGANT DYNAMIC GLASS

## A SEAMLESS OUTDOOR CONNECTION

There is a reason we put glass in our buildings. It is our connection to the outside world. It is often our primary source of daylight in lives increasingly spent indoors. We want to maintain that connection, and benefit from that daylight, without the discomfort of excess heat and glare. All SageGlass dynamic glazing products deliver this by tinting to block heat and glare. However, in many instances, it is unnecessary to tint an entire pane of glass to block the source of heat and glare. Harmony™ has a natural, gradual in-pane tint transition from fully clear to fully tinted to protect you exactly where you need it.

## THE HARMONY ADVANTAGE

- Elegant visual experience with gradual in-pane tint transitions
- Precise solar control
- Glare control without shading devices
- Intelligent daylight management
- Views of the outdoors
- Excellent interior color rendering
- Green building label potential
- Automatic and manual control
- Enhanced biophilic design

## THE HARMONY EXPERIENCE

Harmony does something no other dynamic glazing product can. In addition to the four standard SageGlass tint states, Harmony provides additional states with a seamless, natural in-pane tint transition for targeted solar control, maximum daylight, and excellent interior color rendering. The natural tinting from darker to lighter can be oriented top to bottom or bottom to top, depending on where heat and glare control is needed. SageGlass Harmony is the pinnacle of dynamic glazing technology.

## DESIGN & APPLICATION

- Available as either a triple pane or double pane IGU
- Multiple exterior color choices
- Maximum size: 6 feet by 10 feet
- Available only as a rectangle
- Suitable for a variety of façade applications, including punched openings, ribbon windows, floor to ceiling, and structural glazing

## WHY SAGEGLASS?

**1,000+**  
Installations

**27+**  
Countries

**560+**  
Patents

SageGlass® is the pioneer of the world’s smartest dynamic glass. Electronically tintable SageGlass tints or clears automatically to optimize daylight levels while preventing heat and glare without the need for blinds or shades. SageGlass delivers superior comfort, enhances occupant well-being and saves energy. As part of Saint-Gobain, SageGlass is backed by more than 350 years of building science expertise that only the world leader in sustainable environments can provide.
